Immunization Reporting

The Kentucky Health Information Exchange (KHIE) enables eligible providers and hospitals to electronically transmit patient immunization data to the Kentucky Immunization Registry in support of Stage 1 and Stage 2 Meaningful Use

What KHIE Needs

- ⇒ Signed KHIE participation agreement and addendum
- ⇒ Immunization data feed containing Unsolicited Vaccination Record Update (VXU) messages generated by 2014 CEHRT
- ⇒ HL7 version 2.5.1 messages (HL7 2.3.1 is also supported)
- ⇒ CVX or CPT codes representing the substance administered

How it Works

KHIE will automatically forward VXU messages received on the Immunization data feed to the Kentucky Immunization Registry. Providers and hospitals wanting to view and print patient immunization history will be granted access to the Kentucky Immunization Registry website.

Note that Stage 1 and Stage 2 of Meaningful Use requires the electronic submission of immunization messages, which can only be achieved in Kentucky through the establishment of an Immunization data feed to KHIE.
